

The National Science Foundation is seeking candidates for a Program Director position in the Cognitive Neuroscience Program within the Division of Behavioral and Cognitive Sciences (BCS), Directorate for Social, Behavioral, and Economic (SBE) Sciences, located in Arlington, VA. The Cognitive Neuroscience Program is focused on advancing a rigorous understanding of how the human brain supports thought, perception, affect, action social processes, language, and other aspects of cognition and behavior, including how such processes develop and change in the brain over time. Major duties of the Program Director include implementing the proposal review and evaluation process for the program and recommending awards or declinations based on merit, resource availability, and program goals. Applicants must have a Ph.D. or equivalent experience directly related to the neuroscience of human cognition, language, social behavior and culture sciences; plus six or more years of successful research, research administration, and/or managerial experience pertinent to the program. For additional information, please see:
